

The Largest Public Benefit Next Generation Broadband Network in the USA

OPEN NETWORK

OneCommunity is Ohio's largest public-benefit network provider.

We maintain strong support for Net Neutrality and the Open Internet.

We are committed to providing equitable access to knowledge, content and services and to ensure that our network is a platform for digital collaboration and innovation, without restrictions and barriers.

SERVING COMMUNITIES

THE BIG GIG
CHALLENGE GRANT

OneCommunity team of staffers “swarmed” the region to visit stakeholders and distribute information.

**The Big Gig
Challenge**

You've Got a Need For Speed

**We're Racing To Give
You A Solution**
(Valued up to \$2 million)

ONECOMMUNITY

800 W. St. Clair Avenue, Second Floor, Cleveland, OH 44113
www.onecommunity.org
216.923.2200

**Launched
August 7, 2014**

For the first time, communities can access both the financial and technical assistance needed to plan and build community-wide fiber optic networks.

SERVING COMMUNITIES

“Winning the Big Gig Challenge would allow us to transform North Collinwood into a fiberhood. We’re looking to attract “makers”, literally folks who make things. This would give them a platform to get online and better utilize a website.”

Julia DiBaggio, Community Organizer, Northeast Shores Development Corporation.

THE BIG GIG CHALLENGE GRANT

“The Big Gig Challenge is an opportunity for the City of Shaker Heights to realize the promise of the Chagrin/Lee Fiberhood announced last September at the OneCommunity Annual Meeting at Shaker LaunchHouse. Extending connectivity to the surrounding neighborhoods and community institutions has the potential to accelerate the revitalization of this part of the City.”

Tania Menesse

Director Economic Development
City of Shaker Heights

COMMUNITY

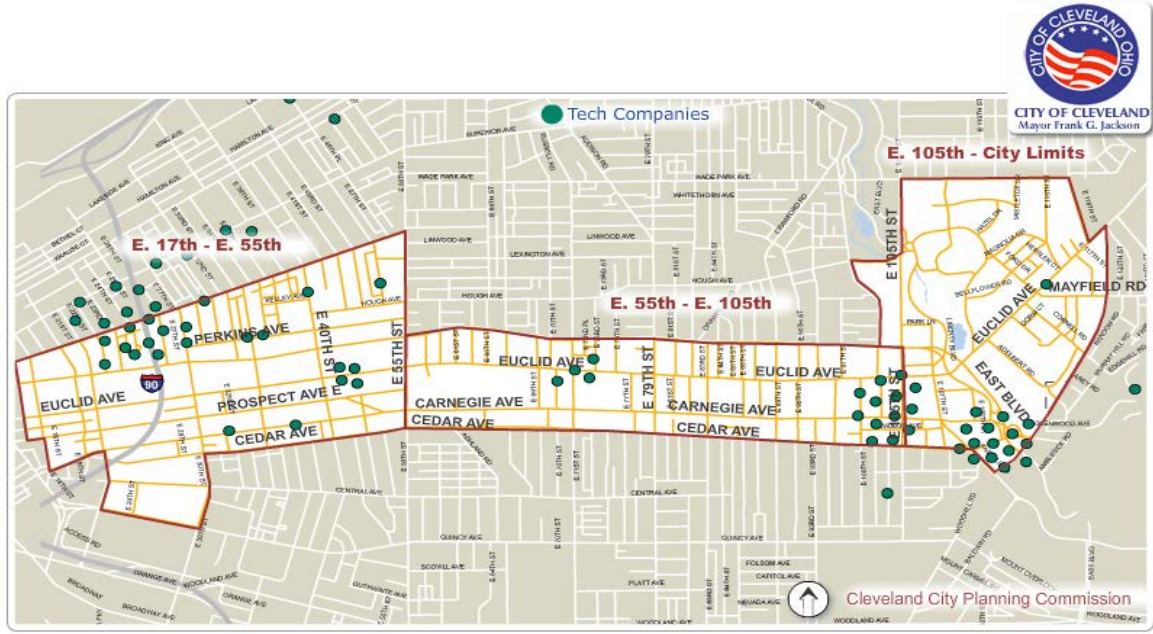

CONNECTING OHIO STUDENTS

OneCommunity wins a \$1.2 million bid to install and maintain dark fiber connecting NEO schools to the State of Ohio's high-speed OARnet backbone.

"This is truly a win-win situation. The hundreds of schools that are networked with these ITCs now have much faster and broader access to the State of Ohio's OARnet network. OneCommunity is thrilled to have been chosen to provide an open network solution for Northeast Ohio schools."

Tony Grech, Director of Sales, Everstream

CONNECTING INNOVATION

"100 gigabit is a game-changer for the Cleveland Health-Tech Corridor. Existing HTC businesses will have access to the cutting edge, next-generation infrastructure they need to thrive, and the doors will be open to new companies who want to leverage 100-gig access as an innovation platform."

Jeff Epstein, Director, Cleveland Health-Tech Corridor
